

## Remarks

### Sequence Listing

Substitute paper and computer readable format copies of a sequence listing accompany this amendment. The substitute sequence listing corrects formal errors present in the prior-filed sequence listing, *i.e.*, provides the number of nucleotides present in SEQ ID NO:20 immediately following its nucleotide sequence, corrects the mis-labeling of the numeric identifier describing the number of nucleotides in SEQ ID NO:64 as <211> in place of <220>, indicates the correct number of nucleotides in SEQ ID NO:65 as 52 in place of 42, and corrects the mis-labeling of the numeric identifier describing the number of nucleotides in SEQ ID NO:67 as <223> in place of <213>. Thus, the substitute sequence listing adds no new matter.

I also believe that the sequence listing information recorded in computer readable format copy of the sequence listing is identical to that of the paper copy of the sequence listing.

Respectfully submitted,

Date June 19, 2006
